IP-BASED SIGNALING
NURSE CALL SYSTEM

NEW IP BASED SIGNALING SYSTEM WITH SIMPLE
UPGRADE POSSIBILITY FOR FULL IP SPEECH
SYSTEM

MAIN FUNCTIONS AND ADVANTAGES OF
HCC-01 IP

• Easy installation and interconnection of system
  components via modern IP (ETHERNET) technology
• Simple and easy operations with color touch screen
  based master terminal
• High standard and user friendly system with possibility
to use voice communication for nurses, doctors and
staff
• History server PC based software with possibility
to download and store call history
• Possibility to connect the system with SQL based
  database information systems
• Optical signalization following DIN VDE 0834 standard
• Possibility to use DECT phones showing information
  about call
• Easy customization and software configuration of the
  system
• Simple installation and maintenance of the system
• Self-diagnostics of the system
• Reliability of operation

► BLUE CODE
• Special button for calling of resuscitation team

► ROOM TERMINAL
• Nurse presence (green button)
• Staff presence (yellow button)
• Programmable buttons in each unit with possibility
to set priority of calls
• Possibility of voice communication with doctors
• Registration of personnel by using wireless RFID cards
• Up to 4 outputs for possible connection with call units
• Possibility to define types of call accepted by room
terminal (e.g. doctor call only)

► PATIENT UNIT
• LAN module for connection to PC/laptop
