

We were subsequently pleasantly surprised by the robustness and reliability of the entire system.

We decided to collaborate with Codaco on the Gerion system due to the ease of installation of the system's wiring, the quality of its in-house electronics manufacturing, its ease of use for the end user, who requires minimal training to get the most out of the system, and its multilingual capability for our market. We were subsequently pleasantly surprised by the robustness and reliability of the entire system.

Gerión Soluciones Asistenciales, Spain

The Codaco team always provides strong after-sales service to ensure long-term collaboration.

We prefer to buy and install the Codaco Nurse Call System because of its stability, user-friendly interface, and flexible integration capability with existing hospital infrastructure. The system provides effective audio and voice communication between patients and medical staff, improving overall patient safety. On top of that, the Codaco team always provides strong after-sales service to ensure long-term collaboration.
